

SAMPLE IDENTIFICATION

IDENTIFICATION OF QUALITY CONTROL SAMPLES

Validity date:
9 September 2013

Each EQA sample is identified for a specific use.

- ◆ The sample code (C1) is mentioned on the upper left corner of the label.
- ◆ The identification code for the survey (13-09-CH) using this sample.
- ◆ The date of validity indicates the deadline for the results submission.
- ◆ If necessary, indications for the storage and the utilisation of the sample.
- ◆ The colour of the labels enhances the security of the identification.

Colour of label (white if not specify)	Sample code	Use
	B1, B2, B3	Molecular biology, Heamochromatosis
	B6	Molecular biology, Haemostasis (sample 1)
	B7	Molecular biology, Haemostasis (sample 2)
	C1	Chemistry
	C2	Neonatal bilirubin
	C3	Bone metabolism-serum
	C7	Ammonium
	CA	Cardiac markers + NT-proBNP
	CK	Chemistry, CKMB
Green	CR	C-reactive protein CRP (this parameter can be included in C1)
	D1	TDM - Therapeutic Drug Monitoring
	D2	TDM - Ciclosporin (Pool)
	D3	TDM - Ciclosporin (Blood 1)
	D4	TDM - Ciclosporin (Blood 2)
	DA	Clinical toxicology, Drugs of abuse
	DD	D-dimers (except NycoCard® & qualitative tests)
Green	DN	D-dimers (NycoCard® & qualitative tests)
	G1	Blood gas, electrolytes, substrates
	G3	Blood gas i-stat Hb+Ht
Blue	G6	Blood gas CO-Oxymetry
Yellow	G7	Blood gas - Bilirubin
	G8	Gram
Pink	H1	Haematology
	H8	Procalcitonin
	H9	Hormonology

Colour of label (white if not specify)	Sample code	Use
Yellow	H31, H32	Haematology, leukocyte differentiation, 3 parts
	H51, H52, H53, H55, H56	Haematology, leukocyte differentiation, 5 parts
Green	H70	Haematology, CRP and 3-Parts (whole blood)
Beige	HA	Glycohemoglobin HbA1C
	Hd1	Haematology, differential, slide 1
Blue	Hd2	Haematology, differential, slide 2
	HF	Glycohemoglobin HbA1C with Afinion
	HP	Glycohemoglobin HbA1C with HPLC
	HR	HIV rapid test
	HRI	HIV rapid test INSTI
	i1	IgE multispecific
Blue	K2	CoaguChek XS Plus (TP)
Blue	K2 Fluid 1	Diluent for sample K2 (CoaguChek XS Plus)
Blue	K2 Fluid 2	Diluent for sample K2 (CoaguChek XS Plus)
Blue	K3	ProTime + i-Stat + HemoChron Junior (TP)
	K4	Coagulation MicroINR
	L1	Forensic medicine - Alcohol
	L2	Forensic medicine - MDV
	LC1	Cerebrospinal fluid
	LY1	Lyme borreliosis
	NM	Photometry
	P1	Toxoplasmosis
	P3	Blood parasitology
	P4	Blood parasitology
	PA1	Pre- and post- analytical phase
	PU	Porphyrins
Yellow	Q1	QBC
Yellow	R1	Haematology, Reticulocytes slide, microscopy
	R2	Haematology, Reticulocytes liquid, automates
	S1	Stool blood
	S8	Strep A
Blue	T1	Coagulation
	T3	HemoChron Junior (aPTT)
	T9	Tumour markers
Yellow	U1	Urine, quantitative determination
Yellow	U2	Urine strips
	U3	Bone metabolism-urine
Yellow	UF	Urine, quantitative determination (specific for Afinion)
	US	Uricult [®]
	V4	Clinical toxicology, CDT
	V8	Hepatitis & HIV, sample 1
	V9	Hepatitis & HIV, sample 2
Beige	VO	Clinical toxicology, Volatile compounds
	VS	Sedimentation rate
	WA1	WADA EQAS Haematological Module 1 - Blood
Beige	WA3	WADA EQAS Haematological Module 2 - Reticulocytes
